TABLE OF CONTENTS

ABOUT THE SURVEY

For more than 113 years, the Association of Food and Drug Officials (AFDO) has served as a major voice for food safety officials in the United States and Canada. The Association proudly represents food safety officials from state and local government at public meetings or briefings where they present consensus opinion or submit official comments on a host of food safety issues. Today, more than ever, there is a call for unity among public health officials in government at all levels and the need to coordinate the available food safety resources in an effort to integrate the nation's food safety system. AFDO has long supported the vision of a nationally integrated food safety system in this country as a logical step in addressing the food safety challenges that exist.

In developing an integrated food safety system, one cannot ignore the enormous capacity and food safety work currently performed at the state and local government levels. It is for this reason that AFDO has once again conducted this resource survey of state food safety programs. We are very pleased to provide this information to you. It, once again, demonstrates the enormity of resource, the extent of effort, and the presence of innovation that exists at the state and local levels. It is also our hope that it provides another argument for advancing efforts to integrate the nation's food safety system. Here is how the survey was conducted:

- Utilizing the FDA Directory of Regulatory Officials, a message from AFDO was submitted to state agency program managers in the fields of food safety, meat, dairy, retail food, animal feed, animal health, epidemiology, and laboratory services. Where possible, program managers were asked to compile agency data from all food protection disciplines into one survey form. An electronic version of the survey was provided with directions on how the survey was to be completed.

- Outreach and promotion was conducted with other government regulatory associations that also represent state and local officials. These associations agreed to promote the survey through newsletters and other communications with their membership.

- Completed survey forms were submitted to the AFDO office where the data was compiled. Follow up for clarification of any submitted data was accomplished by contacting the agency representatives identified on the survey form.

- Other sources of data were obtained through federal agencies and FDA Cooperative Programs (shellfish and dairy). This data was compiled as well.

- A total of 64 survey forms, representing 47 of the 50 states were received. Many responders represented more than one agency within their Department (i.e. Dairy, Food, Meat, Animal Feed).

- Where possible, state responders provided inspection and investigation number estimates for local government jurisdictions. In many cases, the state responders were unable to provide these numbers.

- AFDO has taken extreme care to make sure that no submitted data was duplicated in the survey.

ACKNOWLEDGEMENTS

AFDO wishes to acknowledge the following groups for their assistance in making this survey possible:

- U.S. Food and Drug Administration, Division of Federal State Relations
- U.S. Department of Agriculture, Food Safety & Inspection Services
- U.S. Department of Agriculture, Agricultural Marketing Service
- American Association of Feed Control Officials (AAFCO)
- National Association of State Departments of Agriculture (NASDA)
- Association of State Territorial Health Officers (ASTHO)
- National Association of County and City Health Officials (NACCHO)

AFDO especially wishes to acknowledge the following individuals for their efforts in making this survey and project possible:

- Richard Barnes, U.S. Food and Drug Administration
- Joseph Reardon, U.S. Food and Drug Administration
- Ralph Stafko, U.S. Department of Agriculture, Food Safety and Inspection Services
- Jim Austin, Association of Food and Drug Officials
- Joseph Corby, Association of Food and Drug Officials
- Leigh Ann Stambaugh, Association of Food and Drug Officials
- Randy Young, Association of Food and Drug Officials

AFDO Press Release

AFDO COMPLETES STATE FOOD SAFETY RESOURCE SURVEY AND DIRECTORY OF STATE REGULATORY OFFICIALS

York, PA.

The Association of Food and Drug Officials (AFDO) is pleased to announce the completion and availability of the two documents - *State Food Safety Resource Survey* and *Directory of State Regulatory Officials.* Copies of both of these publications are available on the AFDO and FDA web sites (www.afdo.org and www.fda.gov).

The *State Food Safety Resource Survey* represents a quantitative view of the food safety efforts performed by state and local regulatory agencies during a 12-month period. AFDO had previously conducted this survey in 2001 and 2003, and it greatly helped AFDO in its representation of state food safety programs during testimony in the nation's capitol, while assessing proposed legislation for federal food safety, and providing information to federal legislators and their staff members who are actively pursuing this legislation. According to AFDO Executive Director, Joseph Corby, "The results of the newest survey could not have come at a better time, as government now considers food safety reform and appears to be headed toward an integrated national food safety system. These results clearly demonstrate the critical importance of including the enormous food safety efforts of state and local government into a national food safety system." This latest survey compiled by AFDO includes the following staggering numbers:

Inspections performed – 4,619,256
Investigations conducted – 55,882
Samples collected and tested – 394,070
Recalls coordinated – 1,244

In addition to posting these results on the AFDO and FDA websites, AFDO is preparing survey booklets that contain all the quantitative accounts for reporting agencies. Of the 50 states, 47 participated in this survey.

The *Directory of State Regulatory Officials* was last updated approximately 6 years ago and the latest updated version compiled by AFDO includes the contact information of state regulatory officials involved with food, animal feed, animal health, and food defense functions. AFDO will continue to update this document every 6 months.

AFDO's Board of Directors believes that both of these efforts are very timely given FDA's recent pronouncement that they want to work more closely and collaboratively with state and local government officials in order to meet rising food safety challenges. AFDO has long supported the concept of integrating government food safety resources at all levels as an appropriate action and response to food safety concerns. Most recently AFDO has provided testimony on Capitol Hill on this matter and has partnered on a grant with George Washington University to enhance the roles of state and local government agencies in an integrated food safety system.

Inquiries into these matters can be referred to AFDO's Executive Director, Joseph Corby, at jcorby@afdo.org.

INSPECTIONS

Please check the establishments your agency is responsible for inspecting and how many were performed during the last 12 months for which you have data. If you need to estimate, please be as accurate as possible.

Establishment Type	Licensed by your agency (If yes, please check box)	# of inspections	# from local agencies
☐ Food Processing/Repacking Facilities (excludes dairy)	☐	_____	_____
☐ Dairy Plants (fluid milk, cottage cheese, yogurt)	☐	_____	_____
☐ Manufactured Milk Plants	☐	_____	_____
☐ Dairy Farms (government agencies only)	☐	_____	_____
☐ Retail Food Service Establishments	☐	_____	_____
☐ Temporary Food Establishments	☐	_____	_____
☐ Institutional Food Service Establishments (nursing homes, hospitals, day care, schools, correctional)	☐	_____	_____
☐ Retail Food Stores	☐	_____	_____
☐ Intra-state Wholesale Meat Processors (state meat inspection programs can count each day an inspection was performed as one inspection)	☐	_____	_____
☐ Custom Exempt Meat Plants	☐	_____	_____
☐ Small Animal Slaughterhouses (non-amenable species and game animals)	☐	_____	_____
☐ Feed Manufacturers and Distributors	☐	_____	_____
☐ BSE Inspections	☐	_____	_____
☐ Rendering Plants	☐	_____	_____
☐ Food Transportation Vehicles	☐	_____	_____
☐ Food Salvage Operations	☐	_____	_____
☐ Farm Production (GAPs)	☐	_____	_____

STATE FOOD SAFETY RESOURCE ASSESSMENT

Establishment Type	Licensed by your agency (If yes, please check box)	# of inspections	# from local agencies?
☐ Fruit/Vegetable Packing Houses	☐	_____	_____
☐ Food Warehouses	☐	_____	_____
☐ Shellfish/Crustacea Processing Plants	☐	_____	_____
☐ Frozen Dessert Plants	☐	_____	_____
☐ Shell Egg Plants	☐	_____	_____
☐ Mobile Food Units	☐	_____	_____
☐ Water Vending Machines	☐	_____	_____
☐ Milk Tank Trucks	☐	_____	_____
☐ Home Based Processors	☐	_____	_____
☐ Ice vending machines	☐	_____	_____
☐ Inspection exempt poultry processors	☐	_____	_____
☐ Live poultry markets	☐	_____	_____
☐ Unlicensed facilities	☐	_____	_____

Section Comments for Inspections:

CONTRACT INSPECTIONS

Below, please list the number of annual inspections performed by your agency under contract or agreement with FDA or USDA.

☐ Food Inspections for FDA _____

☐ Medicated Feed for FDA _____

☐ BSE for FDA _____

☐ Tissue Residue for FDA _____

☐ Talmadge-Aiken for USDA _____

☐ Custom exempt meat plants for USDA _____

☐ Country of Origin Labeling (COOL) for USDA _____

☐ Other (specify):_____ _____

STATE FOOD SAFETY
RESOURCE ASSESSMENT

Is your agency involved in any partnership initiative or agreement with federal agencies for the inspection of imported food?
Yes☐ No☐

Do high-risk establishments receive more inspections per year than lower risk establishments?
Yes ☐ If yes, how often are your highest risk establishments inspected: _____
No ☐

Section Comments for Contract Inspections:

INVESTIGATIONS

During the last 12 months for which you have data, how many of the following investigations were performed by your agency? If you need to estimate, please be as accurate as possible. For "Disasters and/or Emergency Response" do not count multiple follow-up investigations that occur following a major episode (i.e. 1 hurricane = 1 investigation).

Investigation Type	# of agency investigations	# from local agencies
☐ Trace backs (not recalls)	_____	_____
☐ Consumer Complaints (excluding FBI)	_____	_____
☐ Shellfish Growing Areas	_____	_____
☐ Commercial Fishing Areas	_____	_____
☐ Farm Pesticide Residue	_____	_____
☐ Chemical Residues in Meat, Milk, Fish & Eggs	_____	_____
☐ Disasters and/or Emergency Response	_____	_____
☐ Animal Health Matters (food safety related)	_____	_____
☐ Other (specify): _____	_____	_____

Section Comments for Investigations:

STATE FOOD SAFETY
RESOURCE ASSESSMENT

FOODBORNE DISEASE

Is your agency responsible for any of the following functions? (Check all that apply)
- ☐ Surveillance for foodborne disease outbreaks
- ☐ Epidemiological investigations of foodborne disease outbreaks
- ☐ Foodborne disease outbreak follow up inspections/investigations at food establishments
- ☐ Receiving and investigating alleged foodborne disease complaints

If more than one agency in your state is responsible for foodborne illness surveillance, investigation and response, do they meet to discuss these issues?
Yes ☐ If yes, how often would they typically meet? _____
No ☐

A **confirmed foodborne disease outbreak** is defined as "a foodborne disease outbreak in which laboratory analysis of appropriate specimens identifies a causative agent and epidemiological analysis implicates the food as the source of the illness."

- During the last 12 months for which you have data, how many **confirmed foodborne disease outbreak** epidemiological investigations did your agency conduct? _____
  Does that include those performed by local agencies? Yes☐ No☐
- During the last 12 months for which you have data, how many **confirmed foodborne disease outbreak** follow up inspections/investigations did your agency conduct? _____
  Does that include those performed by local agencies? Yes☐ No☐

A **foodborne disease outbreak** is defined as "the occurrence of two or more cases of a similar illness resulting from the ingestion of a common food."

- During the last 12 months for which you have data, how many **foodborne disease outbreak** investigations did your agency conduct? _____
  Does that include those performed by local agencies? Yes☐ No☐
- During the last 12 months for which you have data, how many **foodborne disease outbreak** follow up inspections/investigations did your agency conduct? _____
  Does that include those performed by local agencies? Yes☐ No☐

During the last 12 months for which you have data, how many alleged foodborne disease complaints (including ill food worker complaints) were received by your agency? _____

Section Comments for Foodborne Disease:

STATE FOOD SAFETY
RESOURCE ASSESSMENT

ADMINISTRATION, FUNDING and PERSONNEL

Can your agency receive complaints electronically via email, your website, etc?
Yes☐ No☐

Do inspectors utilize field computers/tablets when conducting inspections?
Yes☐ No☐

Do you maintain an active current inventory of regulated establishments?
Yes☐ No☐

Do you maintain an inventory of unlicensed establishments?
Yes☐ No☐

Total number of licensed/permitted establishments _____

Total number of food establishments regulated _____

How is your food safety program funded (by %)
Fees:_____% General Fund Appropriations:_____% Other:_____%

Grants:_____% Federally Funded:_____%

How many full time equivalents (FTEs) dedicated to food safety inspection and investigation does your agency employ?

Field level (excluding labs) _____

Administrative and support _____

What is your entry level educational requirement for Field Inspectors or Investigators (Check Minimum Level)
☐High School ☐4-Year Degree
☐2-Year Degree ☐Other (specify):_____

What training do you require for your Field Inspectors or Investigators? (Check all that apply)
☐Entry Level Training ☐State sponsored programs
☐On The Job Training ☐FDA Standardization
☐ORA-U ☐Other (specify): _____

Do you require Continuing Education for Field Inspectors or Investigators?
Yes☐ No☐

Do you require Field Inspectors or Investigators to be credentialed? (Check all that apply)
•State based registration (such as a Sanitarian or similar) Yes☐ No☐
•National certification (such as NEHA RS or REHS or similar) Yes☐ No☐
•FDA Credentialed Yes☐ No☐
•FDA Commissioned Yes☐ No☐

Has your agency enrolled in the FDA Retail Food Regulatory Program Standards?
Yes☐ No☐
If yes, when did you enroll? Month (Jan-Dec):_____ Year (1999-2009):_____
If yes, do you meet Standard #1, Regulatory Foundation? Yes☐ No☐

STATE FOOD SAFETY
RESOURCE ASSESSMENT

Has your agency enrolled in the FDA Manufactured Food Regulatory Program Standards?
Yes☐ No☐
If yes, when did you enroll? Month (Jan-Dec):_____ Year (1999-2009):_____
If yes, do you meet Standard #1, Regulatory Foundation? Yes☐ No☐

Section Comments for Administration, Funding and Personnel:

ENFORCEMENT ACTIONS

Please check the enforcement authorities your agency possesses. During the last 12 months for which you have data, how many times were they employed?

Authority	# conducted by agency	# conducted by local agencies
☐ Embargo/Seizure/Condemnation	_____	_____
☐ Stop Sale	_____	_____
☐ Health Advisories	_____	_____
☐ Monetary Penalties	_____	_____
☐ License/Permit Revocation	_____	_____
☐ Injunction	_____	_____
☐ Criminal Prosecutions or Complaints	_____	_____
☐ Warning Letters	_____	_____
☐ Hearings	_____	_____
☐ Closures	_____	_____
☐ Voluntary Destruction/Disposal	_____	_____
☐ License/Permit Suspension	_____	_____
☐ Other (specify): _____	_____	_____

During the last 12 months for which you have data, how many food recalls were coordinated and then monitored by your agency? _____

Section Comments for Enforcement Actions:

STATE FOOD SAFETY
RESOURCE ASSESSMENT

FOOD LABORATORY

Please check below if your agency lab (or contracted lab) is capable of performing the following analyses. How many samples were analyzed during the last 12 months for which you have data?

Analysis	# of Samples Analyzed
☐ Food chemistry	_____
☐ Microbiology	_____
☐ Pesticide Residue	_____
☐ Animal Feed Samples	_____
☐ Pet Food	_____
☐ Antibiotic Residue	_____
☐ BSE Ruminant Protein Products	_____

Is your lab accredited? (Check all that apply)
- ☐ A2LA accredited
- ☐ ISO 17025 accredited
- ☐ Working toward A2LA
- ☐ Working toward ISO 17025
- ☐ Not pursuing accreditation
- ☐ Other (specify): _____

Does your agency conduct sampling and analysis for Listeria monocytogenes? (Check all that apply)
- ☐ As part of outbreak response
- ☐ Food product surveillance sampling
- ☐ Environmental surfaces surveillance sampling
- ☐ None

Do you enter data in eLexnet? Yes☐ No☐

Do you participate in FERN? Yes☐ No☐

Are you an LRN lab? Yes☐ No☐

Section Comments for Food Laboratory:

STATE FOOD SAFETY
RESOURCE ASSESSMENT

FOOD DEFENSE

Is food defense incorporated into your food safety program?
Yes☐ No☐

If so, which of the following materials do you utilize? (Check all that apply)
☐ALERT
☐Carver & Shock Assessment
☐Employee FIRST
☐Food Security Guidance documents
☐FAS -CAT
☐Other (specify): _____

Does your agency endorse and utilize the National Incident Management System?
Yes☐ No☐

Does your agency use the Incident Command System (ICS) for managing emergency response?
Yes☐ No☐

What was the date of your last food defense exercise? _____

Type of exercise (Check all that apply)
☐Lecture
☐Seminar
☐Table top
☐Function

Were there participants from other agencies? (Check all that apply)
☐Local agencies from your state
☐Other agencies in your state
☐Other states
☐Federal agencies

Section Comments on Food Defense:

THE END

Thank you! To submit the survey please refer to submission instructions.

Comments for Survey:

SURVEY SUMMARY

One of the primary objectives of this survey is to illustrate the extent of food safety regulatory activities conducted by state and local government agencies. This survey only provides a limited and conservative picture of these activities. Despite the enormity of the figures below, it still represents an incomplete summary of activity.

INSPECTIONS PERFORMED

- Food Processing/Repacking Facilities (excludes dairy) 49,510
- Dairy Plants 5,704
- Dairy Farms (government agencies only) 90,756
- Retail Food Service Establishments 1,590,317
- Temporary Food Establishments 84,887
- Institutional Food Service Establishments 78,278
- Retail Food Stores 422,486
- Custom Exempt Meat Plants 32,730
- Small Animal Slaughterhouses 8,775
- Feed Manufacturers and Distributors 18,511
- BSE Inspections 6,424
- Rendering Plants 847
- Food Transportation Vehicles 4,090
- Food Salvage Operations 1,105
- Farm Production (GAPs) 595
- Fruit/Vegetable Packing Houses 1,922
- Food Warehouses 16,393
- Frozen Dessert Plants 2,635
- Shell Egg Plants 6,362
- Mobile Food Units 31,106
- Water Vending Machines 2,362
- Milk Tank Trucks 7,532
- Home Based Processors 3,124
- Ice vending machines 1,105
- Inspection exempt poultry processors 164
- Live poultry markets 1,212
- Unlicensed facilities 307
- INSPECTION DATA OBTAINED FROM FEDERAL AGENCIES
  - The following statistics represent all 50 states.
    - Food Inspections for FDA[1] (FDA Contract) 9,516
    - Feed & Animal Drugs for FDA[1] (FDA Contract) 6,025
    - State Meat Inspections for USDA[2] (Intra-State Wholesale Meat Processors) 1,672,092
    - Talmadge-Aiken for USDA[2] 452,682
    - Country of Origin Labeling (COOL) for USDA[2] 2,000
    - Manufactured Milk Plants[1] (FDA Cooperative Program) 2,800
    - Shellfish/Crustacea Processing Plants[1] (FDA Cooperative program) 4,902

      [1]=Data courtesy of the U.S. Food and Drug Administration

      [2]=Data courtesy of the U.S. Department of Agriculture
- **Total Inspections (including data from federal agencies) 4,619,256**

CONTRACT INSPECTIONS

- Is your agency involved in any partnership initiative or agreement with federal agencies for the inspection of imported foods?
  - Yes 6
  - No 49
- Do high-risk establishments received more inspections per year than lower risk establishments?
  - Yes 44
  - No 10

INVESTIGATIONS

- Trace backs (not recalls) 391
- Consumer Complaints (excluding FBI) 50,376
- Shellfish Growing Areas 749
- Farm Pesticide Residue 314
- Chemical Residues in Meat, Milk, Fish, and Eggs 162
- Disasters and/or Emergency Response 513
- Animal Health Matters (food safety related) 95
- Other 3,282
- **Total Investigations 55,882**

FOODBOURNE DISEASE

- Is your agency responsible for any of the following functions?
  - Surveillance for foodborne disease outbreaks 32
  - Epidemiological investigations of foodborne disease outbreaks 27
  - Foodborne disease outbreak follow-up inspections/investigations at food est. 47
  - Receiving and investigating alleged foodborne disease complaints 44
- If more than one agency in your state is responsible for foodborne illness surveillance, investigation and response, do they meet to discuss these issues?
  - Yes 42
  - No 8
- During the last 12 months for which you have data, how many confirmed foodborne disease outbreak epidemiological investigations did your agency conduct?
  - Number Conducted 363
- During the last 12 months for which you have data, how many confirmed foodborne disease outbreak follow up inspections/investigations did your agency conduct?
  - Number Conducted 300
- During the last 12 months for which you have data, how many foodborne disease outbreak investigations did your agency conduct?
  - Number Conducted 1,275
- During the last 12 months for which you have data, how many foodborne disease outbreak follow up inspections/investigations did your agency conduct?
  - Number Conducted 1,168
- During the last 12 months for which you have data, how many alleged foodborne disease complaints (including ill food worker complaints) were received by your agency?
  - Number of Complaints 13,404

ENFORCEMENT ACTIONS

- Embargo/Seizure/Condemnation 6,080
- Stop Sale 7575
- Health Advisories 157
- Monetary Penalties 103,975
- License/Permit Revocation 716
- Injunction 31
- Criminal Prosecutions or Complaints 34
- Warning Letters 25,665
- Hearings 5,289
- Closures 1,337
- Voluntary Destruction/Disposal 15,636
- License/Permit Suspension 1,968
- Other 2,046
- **Total enforcement actions 170,509**
- How many food recalls were coordinated and then monitored by your agency? 1,244

FOOD LABORATORY

- Number of Samples Analyzed of:
  - Food Chemistry 80,652
  - Microbiology 202,093
  - Pesticide Residue 14,750
  - Animal Feed Samples 42,750
  - Pet Food 6,135
  - Antibiotic Residue 43,622
  - BSE Ruminate Protein Products 4,068
  - **Total number of samples analyzed 394,070**
- Is your lab accredited?
  - A2LA 6
  - ISO 17025 6
  - Working toward A2LA 5
  - Working toward ISO 17025 15
  - Not pursuing accreditation 11
  - Other 13
- Does your agency conduct sampling and analysis for Listeria monocytogenes?
  - As part of outbreak response 35
  - Food product surveillance sampling 24
  - Environmental surfaces surveillance sampling 23
  - None 6
- Do you enter data in eLexnet?
  - Yes 29
  - No 15
- Do you participate in FERN?
  - Yes 39
  - No 5
- Are you an LRN lab?
  - Yes 22
  - No 21

FOOD DEFENSE

- Is food defense incorporated into your food safety program?
  - Yes 49
  - No 5
- Does your agency endorse and utilize the Nat'l Incident Mgmt System?
  - Yes 51
  - No 4
- Does your agency use the Incident Command System (ICS) for managing emergency response?
  - Yes 53
  - No 1

ADMINISTRATIVE, FUNDING AND PERSONNEL

- Can your agency receive complaints electronically via email, your website, etc.?
  - Yes 56
  - No 3
- Do inspectors utilize field computers when conducting inspections?
  - Yes 39
  - No 20
- Do you maintain an active current inventory of regulated establishments?
  - Yes 55
  - No 4
- Do you maintain an inventory of unlicensed establishments?
  - Yes 17
  - No 41
- Total number of licensed/permitted establishments 793,281
- Total number of food establishments regulated 837,644
- How many full time equivalents (FTEs) dedicated to food safety inspection and investigation does your agency employ?
  - Field Level (excluding labs) 3,379.60
  - Administrative and support 766.45
- What is your entry level educational requirement for Field Inspectors or Investigations?
  - High School 9
  - 2-Year Degree 2
  - 4-Year Degree 47
  - Other 16
- What training do you require for your Field Inspectors or Investigators?
  - Entry Level Training 46
  - On The Job Training 56
  - ORA-U 32
  - State sponsored programs 37
  - FDA Standardization 34
  - Other 16
- Do you require Continuing Education for Field Inspectors or Investigators?
  - Yes 42
  - No 15
- Has your agency enrolled in the FDA Retail Food Regulatory Program Standards?
  - Yes 38
  - No 20
- Has your agency enrolled in the FDA Manufactured Food Regulatory Program Standards?
  - Yes 22
  - No 35

This survey demonstrates a real commitment to food safety at the state and local level, but it is the intangible activities that routinely occur here that should not be overlooked – the innovative efforts to gain industry compliance, the interactions of the agencies with industry and consumers, the promptness of strong enforcement actions. These are all elements that state and local governments employ to protect their citizens. They exhibit dedication and diligence to assure food safety.

AFDO has for many years, supported the goals of resource management at all levels of government to provide synergistic and effective response to all food safety emergencies, including threats and acts of terrorism. We strongly support the concept of integrating all available resources to address food safety and food security as a national concern. Federal agencies and the states have a tradition of working very closely together on public health issues, and any improvement toward integrating the states with their federal counterparts will literally add thousands of food safety and security "foot soldiers" to what is clearly a national effort.

Questions regarding this survey can be referred to AFDO's Executive Director, Joseph Corby, at jcorby@afdo.org or 717-757-2888.

STATE FOOD SAFETY RESOURCE SURVEY

FOODBORNE DISEASE (Table 1 of 3)

Is your agency responsible for any of the following functions?				If more than one agency in your state is responsible for foodborne illness surveillance, investigation and response, do they meet to discuss these issues?			During the last 12 months for which you have data, how many confirmed foodborne disease outbreak epidemiological investigations did your agency conduct?	
Surveillance for foodborne disease outbreaks	Epidemiological investigations of foodborne disease outbreaks	Foodborne disease outbreak follow up inspections/investigations at food establishments	Receiving and investigating alleged foodborne disease complaints	Yes	No	If yes, how often would they typically meet?	# conducted	Does that include those performed by local agencies?

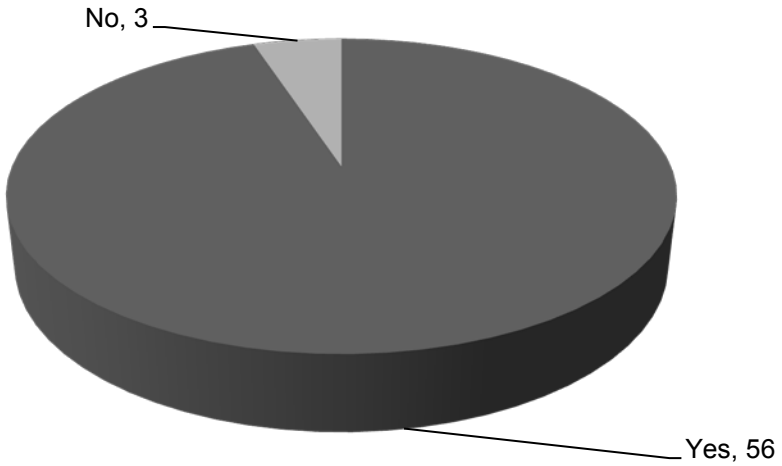
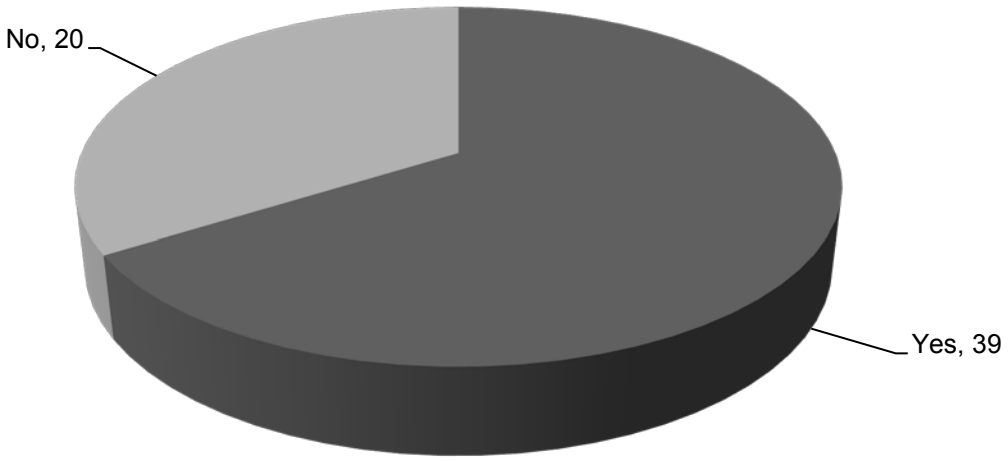
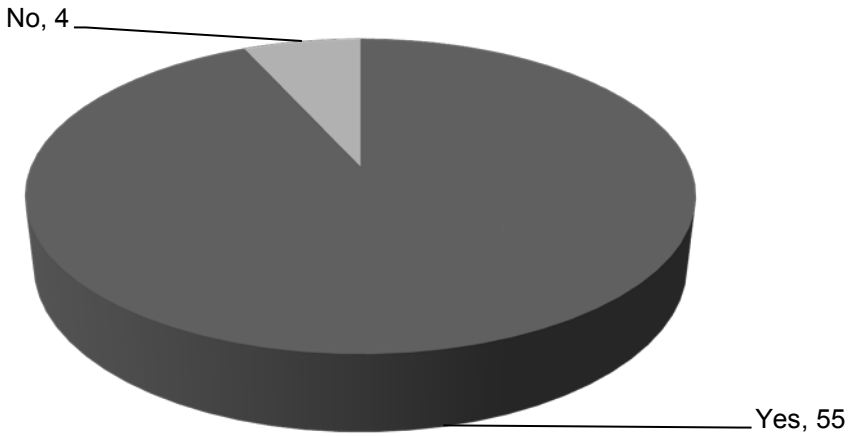
Can your agency receive complaints electronically via email, your website, etc?



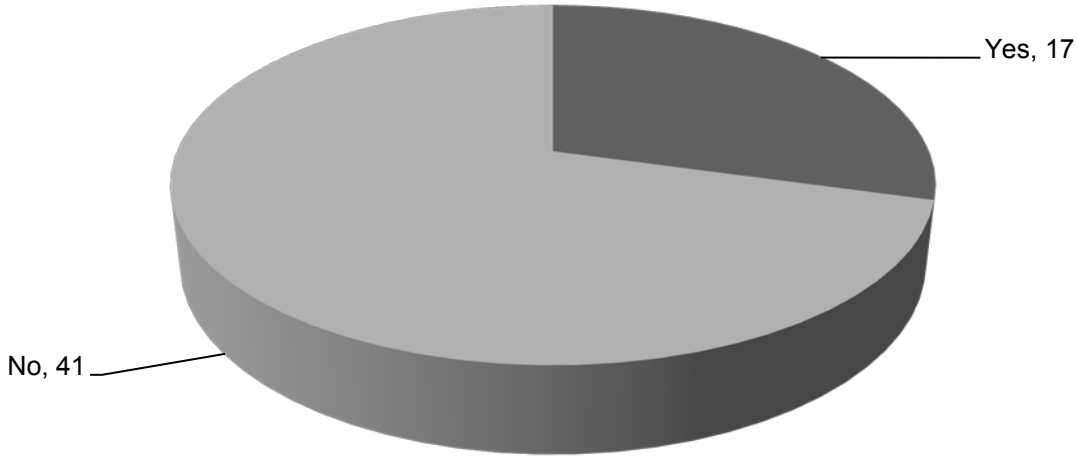
Do inspectors utilize field computers when conducting inspections?

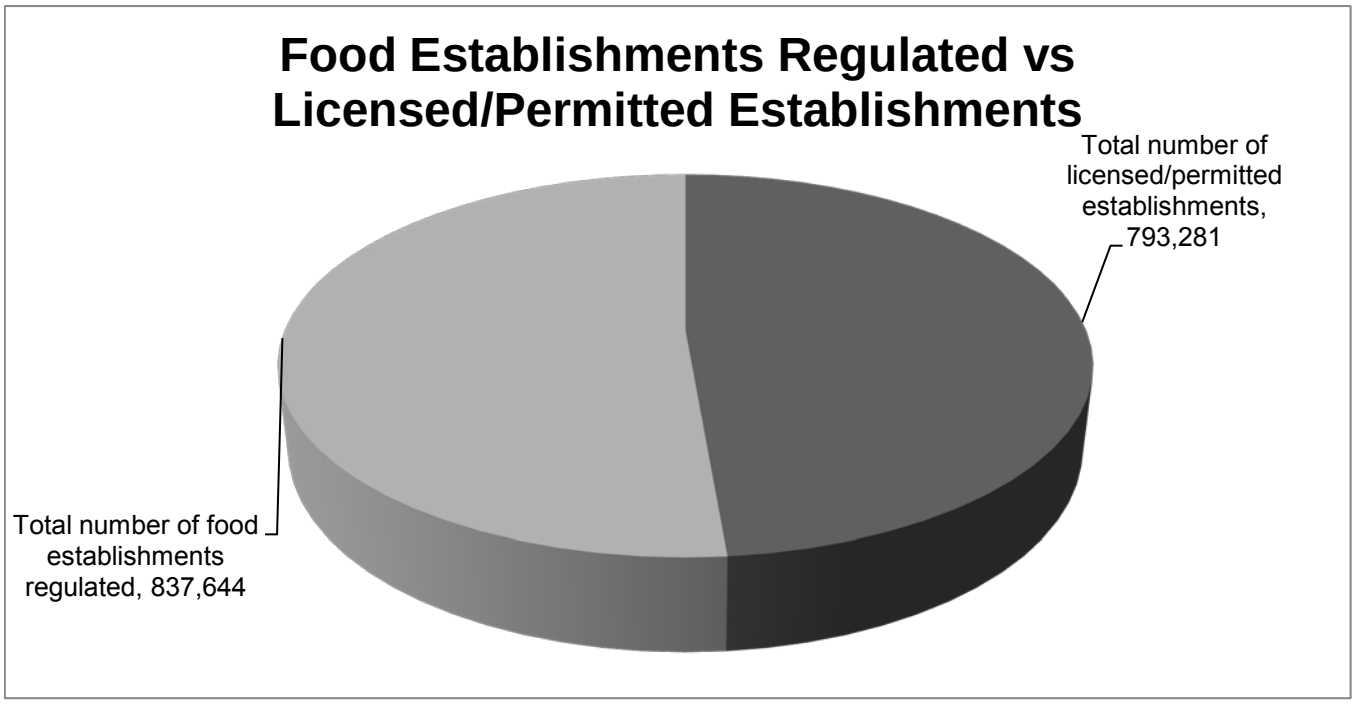


Do you maintain an active current inventory of regulated establishments?

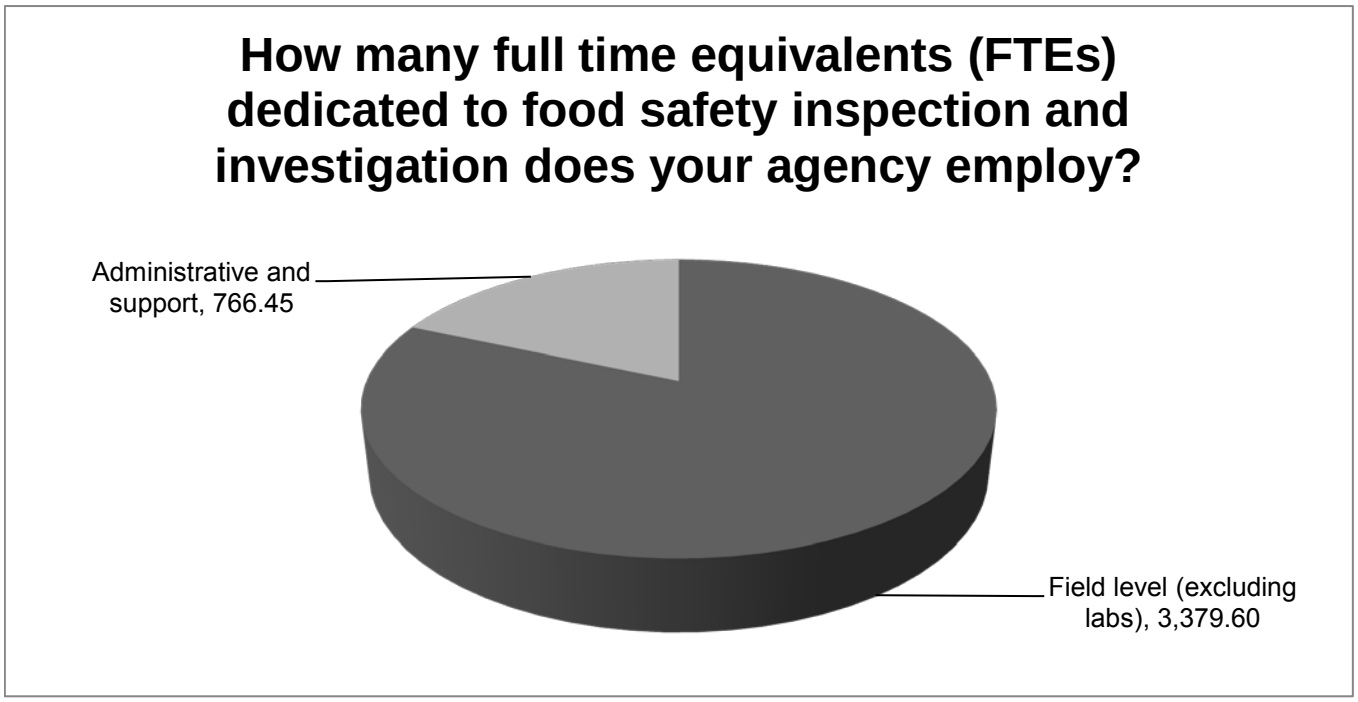


Do you maintain an inventory of unlicensed establishments?



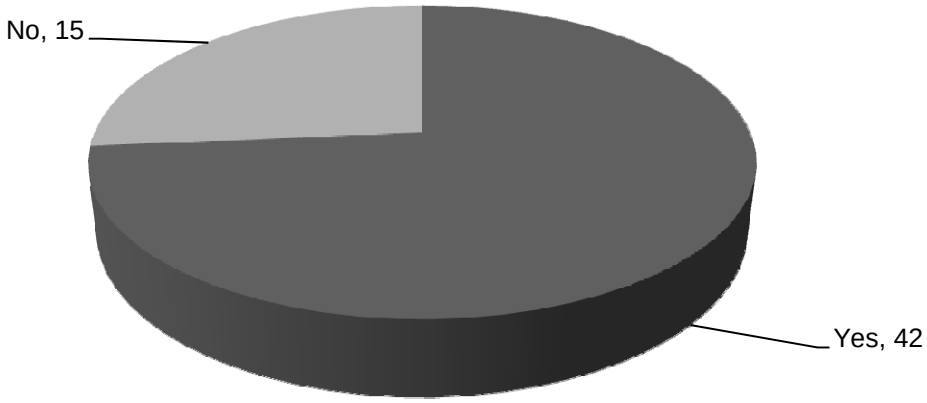


Food Establishments Regulated vs Licensed/Permitted Establishments
Total number of licensed/permitted establishments, 793,281
Total number of food establishments regulated, 837,644

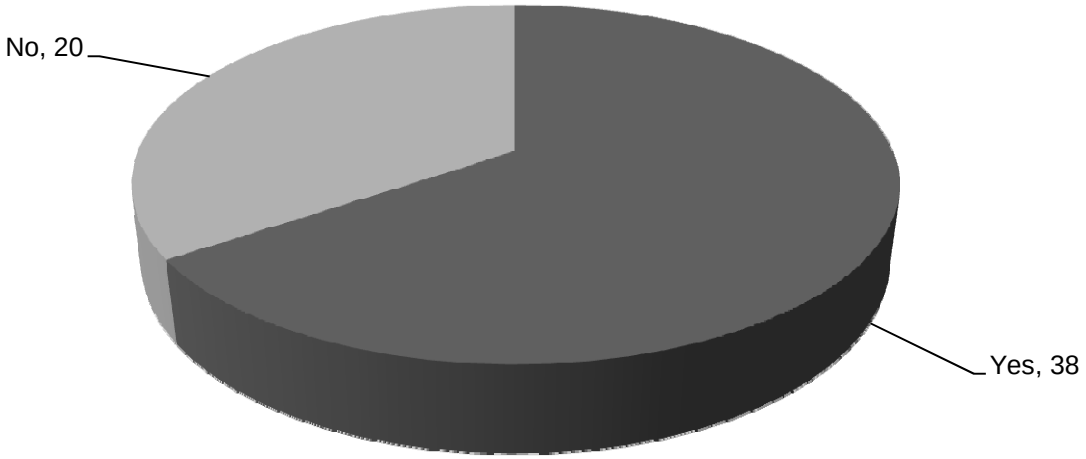


How many full time equivalents (FTEs) dedicated to food safety inspection and investigation does your agency employ?
Administrative and support, 766.45
Field level (excluding labs), 3,379.60

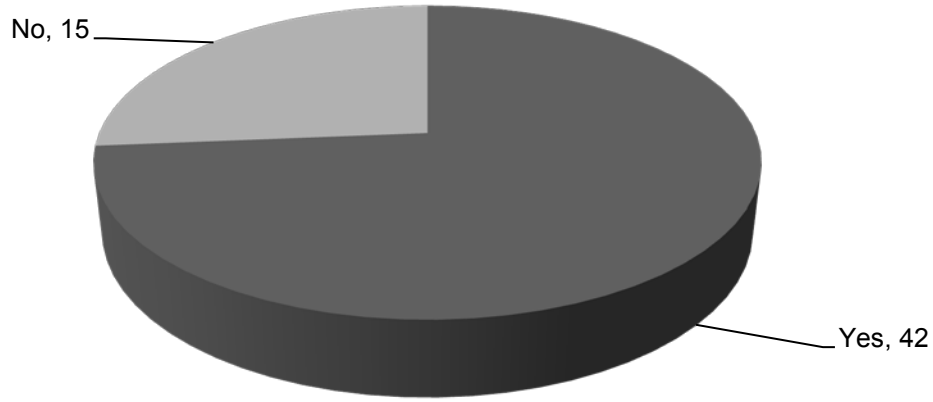
Do you require Continuing Education for Field Inspectors or Investigators?



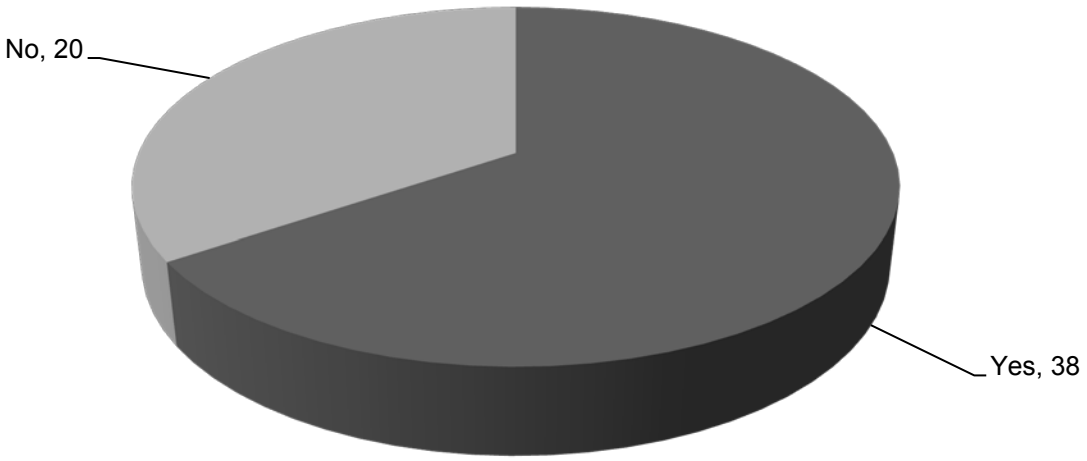
Has your agency enrolled in the FDA Retail Food Regulatory Program Standards?

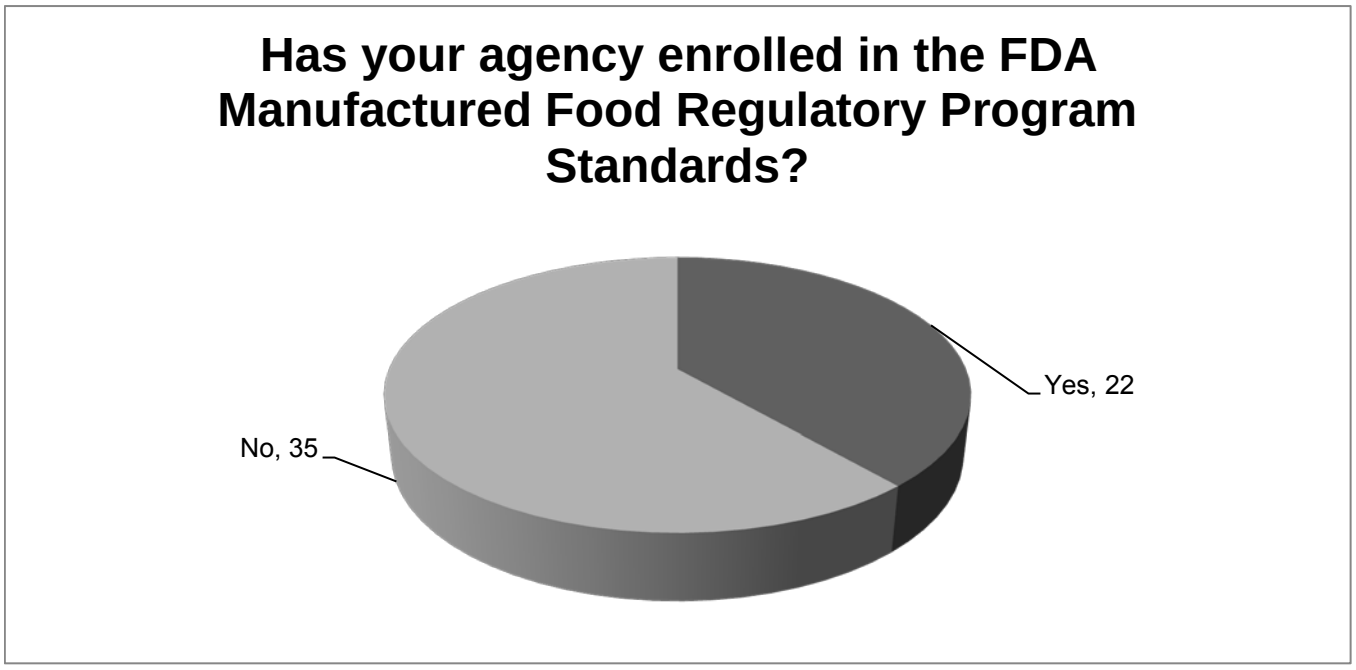


Do you require Continuing Education for Field Inspectors or Investigators?



Has your agency enrolled in the FDA Retail Food Regulatory Program Standards?





Has your agency enrolled in the FDA Manufactured Food Regulatory Program Standards?
Yes, 22
No, 35

INSPECTION DATA OBTAINED FROM FEDERAL AGENCIES

The following statistics represent all 50 states.

Food Inspections for FDA[1] (FDA Contract)

9,516

Feed & Animal Drugs for FDA[1] (FDA Contract)

6,025

State Meat Inspections for USDA[2] (Intra-State Wholesale Meat Processors)

1,672,092

Talmadge-Aiken for USDA[2]

452,682

Country of Origin Labeling (COOL) for USDA[2]

2,000

Manufactured Milk Plants[1] (FDA Cooperative Program)

2,800

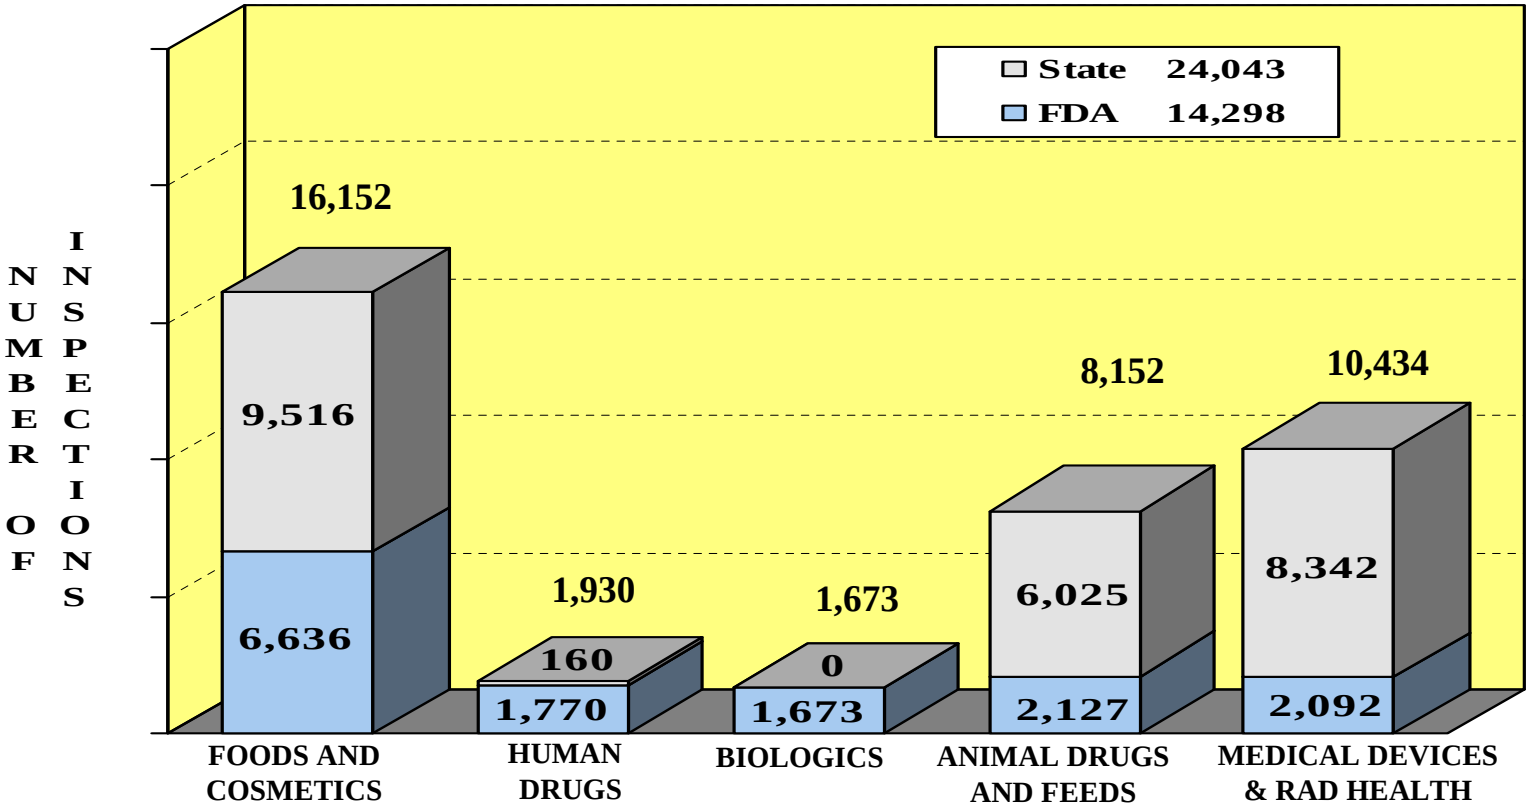
Shellfish/Crustacea Processing Plants[1] (FDA Cooperative program)

4,902

[1]=Data courtesy of the U.S. Food and Drug Administration

[2]=Data courtesy of the U.S. Department of Agriculture

FY 2008 DOMESTIC ESTABLISHMENT INSPECTIONS BY PROGRAM AREA



38,341 Total Domestic Establishment Inspections

An establishment inspection may include one or more program inspections.

In 1999 FDA began including State Partnerships inspections.
Biologics does not fund State Contract Inspections.
MQSA : In 1995 Devices and Rad. Health began funding Mammography Inspections.
BSE : In 1999 CVM began funding BSE Inspections.
(**) Establishment Inspections (site visits) may be less than or equal to the sum of the product category inspections since some establishment inspections cover more than 1 product category. Any single Product Category column is the count of establishment inspections for that product category.

Association of Food and Drug Officials

MISSION STATEMENT

The Association of Food and Drug Officials (AFDO), established in 1896, successfully fosters uniformity in the adoption and enforcement of science-based food, drug, medical devices, cosmetics and product safety laws, rules, and regulations.

AFDO and its six Regional Affiliates provide the mechanism and the forum where regional, national and international issues are deliberated and resolved to uniformly provide the best public health and consumer protection in the most expeditious and cost effective manner.

AFDO ACCOMPLISHES ITS MISSION BY:

- Promoting education, communication and cooperation among government, industry and consumers.
- Fostering understanding and cooperation between industry, regulators and consumers.
- Promoting the adoption and uniform enforcement of laws and regulations at all levels of government.
- Providing guidance and training programs for regulatory officials and the regulated industry, to promote nationally and internationally uniform inspections, analyses, interpretations and investigations.
- Identifying and resolving inconsistencies in consumer and public health protection laws, regulations, standards and policies.
- Providing a permanent working committee structure to research current issues, obtain input from interested parties and produce recommendations for action.
- Developing model laws, regulations and guidance documents and seeking their adoption throughout the United States.
- Conducting an Annual Educational Conference, where for over a century, AFDO has provided the opportunity for individuals from government, industry, and the public to participate, listen, and learn valuable information and develop initiatives concerning food, drug, medical device, cosmetic and product safety issues.

AN AFDO VISION

Integrating the Food Safety System

Today's food safety regulatory structure is a system that consists of multiple government oversight of the food industry and the foods they produce, distribute, and sell. This system, with an infrastructure that includes federal, state, and local government as participants, has served the public extremely well and we proudly boast to have the safest food supply in the world. While the U .S. Food and Drug Administration (FDA) and U.S. Department of Agriculture (USDA) are viewed as the major food safety regulatory agencies in the United States, it is state and local government programs that conduct more than 80% of the food establishment inspections, investigate the majority of foodborne illnesses, and sample the majority of food products for bacteriological or chemical defects. This is an enormous task and responsibility.

To ensure the public of a safe, wholesome, and properly represented food supply, an effective food safety system must be a combined effort of the food industry, the government (at all levels) and the consumer. Surveillance, research, risk assessment, effective regulations with science-based regulatory standards, appropriate inspection, enforcement and compliance activities, training and education must be the cornerstones of any future food safety system. If there is a system breakdown resulting in foodborne illness, the industry must have the willingness and government must have the flexibility and the capacity to move swiftly to determine the cause of the illness, remove the implicated product from the marketplace, and build in strategies to prevent future recurrences.

Does such a system need to be invented? No, this system is already in place today. Is the system perfect? No, but over the years it has continually improved and it has allowed the development of one of, if not, the safest, most abundant, most diverse, and most convenient food supply.

Can our current food safety system be improved? Absolutely, but the Association of Food and Drug Officials (AFDO) believe that we do not need to start over from ground zero—we need to determine more effective ways to enhance the synergism of and to strengthen the effectiveness of the federal, state, and local infrastructure currently in place.

When President Clinton announced the Food Safety Initiative to this country much was said about the role of the federal government to assure the consuming public safe and wholesome food. Originally there was little said about state and local food safety efforts despite the mammoth amount of work that has been done there, and the availability of abundant resources. As a result, AFDO decided to mobilize with their affiliates and state partners and proclaim that no real debate about a national food safety system could exist without including state and local jurisdictions. AFDO has spoken at conferences, seminars, and training workshops where they remind everyone about the enormous resources available in state and local programs. Recently a vision by AFDO was developed detailing their views as to what a national food safety system could and should be. AFDO is aggressively promoting and articulating this vision and the impact we believe it can have on improvement to and resource maximization for food safety in this country.

Within this food safety system we envision the federal government providing leadership through surveillance, technical support, setting of standards, risk assessment, evaluation of programs, certification of field personnel, training, and additional funding where needed. We believe the role of the states and local governments would be to perform domestic inspections, investigations, and collections of samples. Furthermore, we believe it is the responsibility of the federal government to provide the proper regulatory oversight of imported foods at entry point levels. By allowing state and local government agencies to handle domestic food safety affairs the federal government can increase its oversight of imported food, which in our view, is desperately needed. State and local governments should also continue their licensing programs and strong enforcement activities as they see fit. Our vision is one of coordination and uniformity resulting in the elimination of duplicative efforts and better utilization of all current dedicated food safety resources.

An integrated system is a vision of joining these resources into a unified organization. It would include centralizing current and available knowledge relative to food safety such as specific information on animal health, foodborne illness, food establishment inspections, and sample analysis. AFDO also believes an integrated system would include tracking mechanisms for foodborne illness and food defects, which can be monitored by all states and local jurisdictions electronically.

To AFDO, whether the food safety system is implemented by an independent single agency or by multiple agencies is not the key to improving our overall system. What is vitally important, however, is the need to take a new look at our food safety system and to fundamentally change from our current concept of a ‘‘federal system” and a “state/local system” to a fully integrated “national system.” As a prerequisite to accomplishing this task, the roles and responsibilities of each federal agency involved with various aspects of food safety, as well as the roles and responsibilities at the state and local levels must be explicitly defined. Once these roles are clear at the federal level, the roles of the counterparts at the state and local levels will fall into place over time.

AFDO believes this is a daring and comprehensive plan and we continue to solicit input from all potential players in this strategy, including government, industry, and academia. We are currently working very closely with FDA and the National Food Safety System (NFSS) project to better develop and clarify the concept of this plan. A number of NFSS projects are currently in progress including the following:

- ELEXNET – a secure electronic data sharing for food safety laboratory data
- ISO Accreditation – an internationally recognized laboratory accreditation aimed at assuring uniform methodologies for federal and state laboratories
- Directory of Laboratory Capabilities – a compilation to identify state and federal capabilities in event of emergency needs
- AFDO Recall Workgroup – involves state and federal (FDA and FSIS) officials to streamline and better coordinate recalls for increased effectiveness in removal of contaminated product
- Validation of Laboratory Methodologies – a joint federal/state effort to standardize and develop a national rapid detection method
- Foodborne Illness Outbreak Coordination Guidelines – developed to provide uniform investigational procedures and information sharing protocols

- ORA U – Development of a comprehensive national training and certification system for federal, state and local field inspectors
- Uniform Criteria Workgroup – Development of uniform national regulatory standards
- Integrated Food Safety Partnership – Provides a pilot program that integrates the food safety functions of a state and the FDA
- Food Net – Participation and sharing of foodborne illness information
- Pulse Net – Developing and sharing information related to DNA fingerprinting of pathogens associated with disease outbreaks

AFDO concurs with the National Academy of Sciences' "Committee to Ensure Safe Food from Production to Consumption" where they recommend in their 1998 report that:

"The National Food Safety Plan should:

- include a unified, science-based food safety mission;
- integrate federal, state, and local food safety activities;
- allocate funding for food safety in accordance with science-based assessments of risk and potential benefit;
- provide adequate and identifiable support for research and surveillance to:

    - ✓ monitor changes in risk or potential hazards brought on by changes
    - ✓ in the food supply or consumption patterns; and
    - ✓ improve the capability to predict and avoid new hazards;

- increase monitoring and surveillance efforts to improve knowledge of the incidence, seriousness, and cause-effect relationships of foodborne disease and related hazards;
- address the additional and distinctive efforts required to ensure the safety of imported foods;
- recognize and provide support for the burdens imposed on state and local authorities that have primary front-line responsibility for the regulation of food service establishments; and
- address consumers' behavior related to safe food handling practices."

The dwindling resources available for government services mandate that government at all levels develop effective ways to work smarter and more cooperatively in the regulation of food. The states and federal agencies have a long history of working together through various cooperative agreements, contracts, grants, memoranda of understanding, and most recently, partnerships. AFDO believes the time is right to get beyond partnerships and for all major stakeholders at the federal, state, industry, and consumer level to work to develop a "blueprint" for the establishment of a fully integrated national food safety system.

A MESSAGE FROM AFDO

Founded in 1896, the Association of Food and Drug Officials (AFDO) is an international non-profit and democratically run organization consisting of members from government regulatory agencies at all levels, industry representatives and academia. While AFDO's primary focus is with the development and enforcement of uniform food, drug, product safety and other consumer protection laws, the organization has a solid record of accomplishments for improving the nation's health and safety through committee activities, training programs and building of consensus on public health matters.

Here are a few of the major issues in which AFDO is actively engaged:

- Integrating the Food Safety System
- National Uniformity Legislation
- Improvement Strategies for Recalls
- Promotion of HACCP
- Food Safety Education
- Industry and Regulatory Training
- Uniform Regulatory Practices
- States Helping States Project

AFDO has over 18 active committees that you may join including Food, Meat and Poultry, Retail Food, Field, Laboratory, Science and Technology, and Drugs, Devices and Cosmetics. Every committee participates in matters with national importance. You will have the opportunity to make a difference by contributing your expertise and knowledge on issues of both national and regional concern.

National health related issues impact us all and we need you to participate within AFDO and contribute towards our energetic campaign.

A membership application form is included in this booklet. Become "an active part of the solution". Join AFDO today and participate in our efforts.

- *Please ensure that all above contact information is correct and complete.*
- *Group and Contributing memberships must be submitted together as a single package.*
- *In order to receive eNEWS and other AFDO announcements you must supply a valid email address.*
- *All Memberships run on a calendar year basis.*

Individual Membership: This membership category is for individuals to purchase single memberships.

Individual Members

Alumni/Students	☐	$50
Regulatory	☐	$50
Consumers/Educational	☐	$50
Small Business/Consultants	☐	$225
Associate Industry	☐	$325

(Note: If filling this form out on your computer, double-click in the desired box and select "checked" to add an "x".)

☐ I have updated my profile on the AFDO website

☐ I have not updated my profile on the AFDO website

Group Membership: This membership category is for those agencies or organizations that would like reduced rates for an increased number of memberships.

Group membership renewals must be submitted together as a single package.

# of Group Members	Government	Non-Government
5-10	☐ $46 each	☐ $300 each
11-20	☐ $44 each	☐ $285 each
21-50	☐ $42 each	☐ $270 each
Greater than 50	☐ $40 each	☐ $255 each

Contributing Membership: This membership category is for those agencies or organizations that would like to support the on-going activities of the association through an "increased" level of contribution.

Contributing membership renewals must be submitted together as a single package.

Contributing Member	Government	Non-Government
Platinum	☐ 5 memberships for $750	☐ 5 memberships for $2,500
Gold	☐ 3 memberships for $500	☐ 3 memberships for $1,750
Silver	☐ 2 memberships for $350	☐ 2 memberships for $1,250

AFDO Innovation/Excellence Awards

FDA Leveraging/Collaboration Award
Received June 2006

For AFDO's involvement in the Manufactured Foods Regulatory Program Standards Committee.

USDA/FSIS Special Recognition Award
Received June 2003

In recognition of the Association of Food and Drug Officials' national contributions to food safety.

Vice-President Gore's National Performance Hammer Award
Received November 2000

For AFDO's cooperative and partnership efforts with the Food and Drug Administration in providing training to the import/export industry in various locations around the country.

Vice-President Gore's National Performance Hammer Award
Received August 1999

For AFDO's cooperative and partnership efforts with the Food and Drug Administration in providing training to the import/export industry in various locations around the country.

1999 USDA Secretary's Honor Award
Received June 1999

For AFDO's involvement in the Seafood HACCP Alliance Group, which was recognized for outstanding contributions to the citizens of the nation through the collaborative development of a new Hazard Analysis and Critical Control Point (HACCP) inspection system.

Center for Food Safety and Applied Nutrition's Team Award
Received May 1999

For outstanding dedication and initiative in developing innovative approaches to coordinate and integrate the food safety systems of federal, state and local agencies in accordance with the President's Food Safety Initiative.

FDA's Commissioner Special Citation Award
Received May 1999

For creative and determined leadership in proposing, promoting and conducting a broad range of food safety initiatives in cooperation with FDA.

Vice-President Gore's National Performance Hammer Award
Received September 1997

For AFDO's instrumental involvement in the Seafood HACCP Alliance Training Program, which resulted in the training of thousands of state, federal and industry members in how to meet FDA's new Seafood HACCP Regulations. Even today, this program continues to train many others.
