

CBD and Hemp Manufacturing and Safety A Three-Part Webinar Series

October 20, 27 & November 4, 2021, each at 1pm ET

[Register](#)

EAS Consulting Group, leaders in FDA, USDA and state regulatory issues, is hosting a three-part series on CBD and hemp regulations. From a higher level look at where federal regulations stand today to a deeper dive into safety considerations when manufacturing a food, supplement or tincture, our experts will explore best practices, testing considerations. If you are working in the cannabis space, this is a must-see comprehensive event.

October 20, 2021: Part One

CBD and Hemp Testing: Requirements from Farm to Table

Presented by Paul Burns, Vice President of Sales, Certified Laboratories, Dietary Supplements & Botanicals & Tim Lombardo, EAS Senior Director, Food Consulting Services

What are the testing requirements for raw materials and finished goods? How can those results be interpreted? A determination of safety and specifications compliance must be demonstrated throughout the manufacturing process, with differing tests and results requirements for food and supplement products. Learn what you need to know and what questions to ask of your laboratory testing partner to ensure your raw materials, in-process and finished goods meet your and your customers' expectations.

October 27, 2021: Part Two

CBD and Hemp: The Manufacturing Process, from Biomass and Beyond

Presented by Tim Lombardo, Senior Director, Food Consulting Services & Omar Oyarzabal, Ph.D. EAS Independent Consultant

Once CBD is extracted from the biomass it can be added to products such as food, supplements and personal care products, but what are the best practices for doing so? Differing safety regulations are in place depending on the type of products produced, but all manufacturing processes have one thing in common: a demonstration of safety. Understanding Good Manufacturing Practices and how they apply is paramount. Learn more about the benefits and challenges of water and oil extractions, ensuring sanitary transport of materials and goods and more.

November 4, 2021: Part Three

CBD and Hemp: A Potpourri of Federal and State Regulations and Prohibitions

Presented by Tim Lombardo, EAS Senior Director, Food Consulting Services & Tara Lin Couch, Ph.D., Senior Director, Dietary Supplement and Tobacco Services

The CBD and hemp industry faces a confusing array of requirements. From USDA's 2018 Farm Bill covering the legal manufacture of CBD isolates to FDA's declaration of a federally illegal product, to a patchwork of state regulations, understanding the what's and how's of regulatory requirements is daunting.

In part three of our series, we'll look at where regulations stand today with regards to manufacturing and labeling as well as highlight some disparities from state to state.

About EAS Consulting Group

EAS Consulting Group, as part of the Certified Group of companies, has merged with Food Safety Net Services, (FSNS), to become the global leader in testing and regulatory solutions for the FDA and USDA regulated industries.

EAS' network of over 200 independent advisors and consultants enables us to provide comprehensive consulting, training and auditing services, ensuring proactive regulatory and quality compliance for food, dietary supplements, pharmaceuticals, medical devices, cosmetics, tobacco, hemp and CBD.

The merger of FSNS ([FSNS.com](https://www.fsns.com)) with the Certified Laboratories group of companies, ([certified-laboratories.com](https://www.certified-laboratories.com)), has created a leading, national testing and regulatory consulting platform. EAS can assist with your regulatory and quality requirements and challenges, while offering access to a robust scope of testing services to meet your organization's sophisticated needs.

From regulatory strategy, auditing, training, FDA inspection preparation, 483 & Warning letter remediation, quality system implementation, labeling compliance, preparation of technical submissions such as GRAS, Food Additive Petitions, DMFs, NDIs, 510(k)s and more; to FSMA compliance, expert witness services and due diligence assessments, EAS offers the expert knowledge and experience your company requires to ensure compliance through accurate and timely assistance. With our vast expertise in FDA's and USDA's policies and enforcement, EAS is the proven choice for assistance with product testing and other regulatory and quality consulting solutions.
