Norovirus in Retail Session Descriptions

DAY 1

A Year in Review: Goals and Accomplishments

The workgroup leads will review the group's activities the last year and what they hope to accomplish this year. The subcommittees will review their strategic plans and what they've accomplished.

Phase 2: Future Direction and Outcomes

This discussion-based session will focus on what the workgroup members would like to see in Phase 2, with feedback from the advisory group. The advisory group includes SMEs from EPA and CDC. The discussion will be useful for the next day when the subcommittees break out to develop their strategic plans. Leads will start off with describing what they envision for the subcommittee, then the room will brainstorm where the gaps are and what opportunities there are.

DAY 2

Review of Yesterday

The workgroup leads will review high-level points from yesterday to re-cap the discussion.

Subcommittee Breakout Rooms

The subcommittees will break out to develop their strategic plans. Discussion from the first day will help groups develop their plans moving forward. A strategic plan template will be given to the subcommittees to fill out.

Notes:

NOTES for Future Direction Session

- This could include addressing how we will disseminate our findings (conferences, publications, reaching the right audiences)
- Need to address how the sick worker toolkit ties in with the environmental contaminants group
- Leads to make a slide on what their future direction looks like so far
- Discussion questions before conference, make slide with 3 questions:
 - What gaps do you see?
 - What opportunities are there?

NOTES for Subcommittee Breakout Room

Advisory Members:

- Will ask subcommittee leads before meeting which advisory members they need in their room based on the registration list. Subcommittee leads can personally reach out to these members to invite them to their breakout.
- If unsure about some members, we can talk with them after the first day to see which breakout they should go to the following day.

Deliverables:

- Will provide subcommittees with a strategic plan template, based on the current plans.
- At the end of the conference, the subcommittees should have a new strategic plan.
- A summary of the discussions and new strategic plans will be created to send to whole group after conference.
