AFDO Healthy People 2030 Initiative

Purpose Statement

Provide food safety and public health professionals practical and effective tools, resources, and guidance that, when implemented, help drive down the number of specific foodborne illnesses in the United States.

Organizational Chart

- Also needs to be flexible based on need, volunteer availability, HP2030 goals
- Example: One Health and Root Cause Analysis workgroups born out of the Produce Workgroup
 - Identified food safety importance of increasing the scope of the two groups
 - Brought in new workgroup members with additional perspectives
 - Adjustments can strengthen the overall workgroup and the work we produce
